Enter First name
Isha
Enter Surname
Savaliya
Enter Email
ishasavaliya@gmail.com
Record added
---- Student Records ----
First Name: Isha
Surname: Savaliya
Email: isha.savaliya@gmail.com
------------------------
First Name: Isha
Surname: Savaliya
Email: ishasavaliya@gmail.com
------------------------
```

firstname	surname	email
Isha	Savaliya	isha.savaliya@gmail.com

Conclusion:
In this program, user input (first name, surname, and email) was taken from the console and inserted into the **student** table securely using parameterized queries. After inserting the record, the program retrieved all student records from the database and displayed them on the console using ResultSet.
