Marwadi University Marwadi Chandarana Group NAAC A+	**Marwadi University** **Faculty of Technology** **Department of Information and Communication Technology**	
Subject: Advanced Java (01CT1623)	**Aim:** Create Java web application Using Servlet For Manage blogs.	
Task-2	**Date :-21-04-2026**	**Enrollment No:-** 92301733024

AddBlogServlet:

```
package com.blog;

import javax.servlet.*;
import javax.servlet.http.*;
import javax.servlet.annotation.WebServlet;
import java.io.IOException;
import java.sql.*;

@WebServlet("/addBlog")
public class AddBlogServlet extends HttpServlet {
   protected void doPost(HttpServletRequest req, HttpServletResponse res)
         throws ServletException, IOException {

      String title = req.getParameter("title");
      String content = req.getParameter("content");
      String username = req.getParameter("username");

      try {
         Connection con = DBConnection.getConnection();
         String sql = "INSERT INTO blogs(title, content, username) VALUES(?,?,?)";
         PreparedStatement ps = con.prepareStatement(sql);

         ps.setString(1, title);
         ps.setString(2, content);
         ps.setString(3, username);

         ps.executeUpdate();
         res.sendRedirect("index.jsp");

      } catch (Exception e) {
         e.printStackTrace();
      }
   }
}
```

Blog:

```
package com.blog;

import java.sql.Timestamp;

public class Blog {

   private int id;
```

```
    private String title;
    private String content;
    private String username;
    private Timestamp publishedAt;

    // Getters & Setters

    public int getId() { return id; }
    public void setId(int id) { this.id = id; }

    public String getTitle() { return title; }
    public void setTitle(String title) { this.title = title; }

    public String getContent() { return content; }
    public void setContent(String content) { this.content = content; }

    public String getUsername() { return username; }
    public void setUsername(String username) { this.username = username; }

    public Timestamp getPublishedAt() { return publishedAt; }
    public void setPublishedAt(Timestamp publishedAt) { this.publishedAt = publishedAt; }
}
```

BlogServlet:

```
package com.blog;

import javax.servlet.*;
import javax.servlet.http.*;
import javax.servlet.annotation.WebServlet;
import java.io.IOException;
import java.sql.*;
import java.util.ArrayList;
import java.util.List;

@WebServlet("/blogs")
public class BlogServlet extends HttpServlet {

    protected void doGet(HttpServletRequest request, HttpServletResponse response)
            throws ServletException, IOException {

        List<Blog> blogList = new ArrayList<>();

        try {
            Connection con = DBConnection.getConnection();
```

```
        if (con == null) {
            throw new Exception("Database connection failed");
        }

        String sql = "SELECT * FROM blogs ORDER BY id DESC";
        Statement st = con.createStatement();
        ResultSet rs = st.executeQuery(sql);

        while (rs.next()) {
            Blog b = new Blog();
            b.setId(rs.getInt("id"));
            b.setTitle(rs.getString("title"));
            b.setContent(rs.getString("content"));
            b.setUsername(rs.getString("username"));
            b.setPublishedAt(rs.getTimestamp("published_at"));

            blogList.add(b);
        }

    } catch (Exception e) {
        e.printStackTrace();
    }

    request.setAttribute("blogs", blogList);
    RequestDispatcher rd = request.getRequestDispatcher("index.jsp");
    rd.forward(request, response);
  }
}
```

BDConnection:

```
package com.blog;

import java.sql.Connection;
import java.sql.DriverManager;

public class DBConnection {

  public static Connection getConnection() {
    Connection con = null;

    try {
        Class.forName("com.mysql.cj.jdbc.Driver");

        con = DriverManager.getConnection(
```

```
            "jdbc:mysql://localhost:3306/blogdb?useSSL=false&serverTimezone=UTC",
            "root",
            ""
        );

        System.out.println("✅ Database Connected");

    } catch (Exception e) {
        System.out.println("❌ DB Connection Failed");
        e.printStackTrace();   // VERY IMPORTANT
    }

    return con;
  }
}
```

EditBlogServlet:

```
package com.blog;

import javax.servlet.*;
import javax.servlet.http.*;
import javax.servlet.annotation.WebServlet;
import java.io.IOException;
import java.sql.*;

@WebServlet("/editBlog")
public class EditBlogServlet extends HttpServlet {
  protected void doPost(HttpServletRequest req, HttpServletResponse res)
        throws ServletException, IOException {

    int id = Integer.parseInt(req.getParameter("id"));
    String title = req.getParameter("title");
    String content = req.getParameter("content");

    try {
        Connection con = DBConnection.getConnection();
        String sql = "UPDATE blogs SET title=?, content=? WHERE id=?";
        PreparedStatement ps = con.prepareStatement(sql);

        ps.setString(1, title);
        ps.setString(2, content);
        ps.setInt(3, id);

        ps.executeUpdate();
```

```
            res.sendRedirect("index.jsp");

        } catch (Exception e) {
            e.printStackTrace();
        }
    }
}
```

Index.html:

```
